

Docket No. 1156.43704TRN
Serial No. 09/712,914
August 1, 2005

AMENDMENTS TO THE SPECIFICATION:

Please delete paragraph [0006] at page 3, and substitute therefore the following new paragraph:

—It will generally be, the purchaser who ~~program~~ programs the phone under the above circumstances. Therefore, the process must be straightforward as the programmer will inevitably be relatively inexperienced.—

Please delete paragraph [0009] at page 4, and substitute therefore the following new paragraph:

—In accordance with the present invention there is provided a communication device addressable with reference to identifying data comprising a processor responsive to a code for controlling the storage of identifying data ~~in~~ in the memory locations, the processor being responsive to an incoming signal addressing the device with reference to the stored identification data to change the code for subsequently controlling the storage of identification data in the memory locations.—

Please delete the paragraph [0013] at page 5, and substitute therefore the following new paragraph:

—The second code is advantageously another phone specific code. This second code is then known only to the service provider who can provide the information to the phone purchaser once the terms of the initial contract have been complied with. Once the second code is known to the user, any service provider which can be used as the NAM can be programmed and reprogrammed at will. In this way once the initial period of the contract has expired the user can select a new service provider and is free to change operator.—
